This volume is an invaluable one-stop reference book for anyone wanting a brief and accurate account of the life and work of those who created science from its beginnings to the present day. The alphabetically organized, illustrated biographical dictionary has been thoroughly revised and updated, covering over 1,500 key scientists (157 more than in the previous edition) from 40 countries. Physics, chemistry, biology, geology, astronomy, mathematics, medicine, meteorology and technology are all represented and special attention is paid to pioneer women whose achievements and example opened the way to scientific careers for others. This new edition includes recent Nobel laureates, as well as winners of the Fields Medal, the mathematicians equivalent of the Nobel Prize. Illustrated with around 150 portraits, diagrams, maps and tables, and with special panel features, this book is an accessible guide to the world's prominent scientific personalities. David Millar has carried out research into the flow of polar ice sheets at the Scott Polar Research Institute, Cambridge, and in Antarctica. He has also written on a range of science and technology topics, and edited a study of the politics of the Antarctic.
